

VISCOFAN EDIBLE COLLAGEN CASING

Product Description – “A” Series

Introduction

VISCOFAN Edible Collagen Casings are uniform sanitary tubular casings made of reconstituted bovine collagen and other food-grade ingredients. The casings are used by processing plants inspected by the United States Department of Agriculture (U.S.D.A.) located in the United States of America (U.S.A.) and are also used by food manufacturers throughout the world. They are used to manufacture edible sausage and sausage products utilizing modern high-speed equipment.

Composition

A typical “A” series VISCOFAN Edible Collagen Casings product contains the following ingredients which are listed in the order of their predominance in the product:

- Collagen
- Water
- Glycerin
- Cellulose
- Oil (Vegetable)
- Sodium Carboxymethylcellulose:

Regulatory

VISCOFAN Edible Collagen Casings are accepted by the U.S.D.A. for use in federally inspected establishments. The ingredients used are subject to regulations by the Food and Drug Administration (F.D.A.). Viscofan Collagen USA Inc. operates a plant in Bridgewater, New Jersey, which is inspected by the F.D.A. and the New Jersey State Department of Health. For shipments of VISCOFAN Edible Collagen Casings outside the U.S.A. by a party other than Viscofan Collagen USA Inc., the responsibility to ensure regulatory compliance in the import country is that party’s sole responsibility.

<u>Microbiological Standards</u>		<u>Pathogen Standards</u>	
Aerobic Plate Count:	< 10 ⁴ cfu/g	Listeria:	negative / 25 g
Coliforms:	< 3 cfu/g	Salmonella:	negative / 25 g
Yeast & Mold Count:	< 100 cfu/g		

Storage Conditions

VISCOFAN Edible Collagen Casings should be stored in a cool, dry location at 40°-70°F. The box over-wrap should not be unsealed until the casing is ready to be used. Likewise, any casing that is leftover to be used at a later time should be resealed to retain proper moisture levels.
